## **Schemes For The Calculation Of The Partner's Remuneration**

The Partner's Remuneration is calculated based on the following formula:

**For PRO.MT4 (Spot-Metals instruments), DIRECT.MT5 (Spot-Metals instruments),  
GLOBAL.MT5 accounts:**

Spreads of the Special Transactions converted into USD at the current platform exchange rate at the time the Special Transaction performed \* the volume of the Special Transaction in lots \* K

**For NDD.MT4 (Spot-Metals instruments), NDD.MT5 (Spot-Metals), GLOBAL.MT5 (Currency market; Spot-Metals instruments) accounts:**

The volume of the Special Transactions converted into USD at the current market exchange rate at the time of the Special Transaction \* the applicable commission \* K

K is the minimal coefficient of the Partner's Remuneration that is equal to 30% ( $K=0.3$ ). By a mutual agreement of the parties and depending on the Partner's performance, the coefficient may be raised up to 60% ( $0.3 \leq K \leq 0.6$ ).

'Spread' means the minimum spread specified in the Specification of contracts.

The Partner's Remuneration is calculated based on closed Special Transactions only. Currently open Special Transactions, at the time of monthly calculations, will be included in the calculation in the following month after closure.
